DHEERAJ BIDKAR

Senior Salesforce Developer

+91 9644172956 | dheerajbidkar.sfdc@gmail.com | https://www.linkedin.com/in/dheeraj-b-860573175/

As a Senior Salesforce developer with over 5+ years of practical experience in the IT sector, I have honed my expertise in crafting, sustaining, and launching applications on the Salesforce.com platform. I am enthusiastic about thriving in a dynamic and challenging setting, aiming to leverage my skills for excellence across diverse domains. My dedication to ongoing learning propels me to consistently deliver value to the organizations I engage with, harnessing my capabilities for optimal impact.

PROFESSIONAL SUMMARY :

- **Salesforce Mastery:** Possess extensive expertise across Salesforce CRM solutions, including Development, Administration, Configuration, Implementation, and Support, with a focus on Apex programming proficiency.
- **Agentforce & AI:** Hands-on experience with Salesforce Agentforce, including designing AI-powered agents, configuring topics/subagents, instructions, actions, and custom Apex-based actions to automate business processes and provide intelligent customer support. Experienced in integrating Agentforce with Salesforce data and business workflows while applying appropriate access and security considerations.
- **Lightning Web Components:** Skilled in developing components using Lightning Web Component technology.
- **Customization and Configuration**: Expert in tailoring Custom and Standard objects and fields, designing page layouts, managing record types, crafting Email Templates, and configuring Lightning App Builder components.
- **Security Acumen**: Possess an in-depth understanding of Salesforce's robust Security model.
- **Apex Development**: Proficient in Apex programming, encompassing the creation of Apex Classes, Apex Triggers, Batch Apex, and Schedule Apex.
- **Deployment Know-How:** Familiar with the Salesforce Deployment process through Change Sets.
- **Governor Limits and Optimization:** Demonstrated ability to work within Salesforce's Governor limits and optimize code to comply with them.
- **Agile Development Participation**: Participated in Agile development processes including daily stand- up meetings, sprint planning, retrospectives, and code reviews.
- **Integration with Third-party Applications:** Knowledgeable about Salesforce integrations with third- party applications using REST API.
- **Quick Learning:** Adept at rapidly grasping and effectively applying new technologies and methodologies to projects and ongoing operations.
- **Versatility:** Skillful in Lightning Components, SOQL, Asynchronous Apex, and utilizing the Salesforce Lightning Design System to enhance user experience.

SKILLS :

Salesforce Technologies:

- Salesforce Administrator
- JavaScript
- Apex Language
- Apex Classes
- Apex Triggers
- SOQL
- Visualforce Pages
- Visualforce Components
- Visualforce Controllers
- Apex Data Loader
- Salesforce CPQ
- Agentforce

- Reports
- Force.com IDE
- Dashboards
- Salesforce Lightning Web Components
- Custom Objects
- Data Cloud

Data Management & Tools :

- VS Code
- Workbench
- AI Tools
- Apex Data Loader
- ANT Deployment Tool
- Git / GitHub
- Change Sets
- Salesforce Inspector
- Postman

EXPERIENCE :

09/2024 – Present ***Senior Salesforce Developer, Mirketa Inc. , Noida, India***

- **Client: *MoMA – The Museum of Modern Art, New York* (U.S.-Based Art and Cultural Institution)**

  Responsibilities:

- Led a team of Salesforce developers in designing, developing, and delivering scalable Salesforce solutions for membership management, visitor engagement, ticketing, donor tracking, and event management.
- Collaborated with museum stakeholders, business analysts, and cross-functional teams to understand business requirements, define technical solutions, and translate them into detailed user stories and development tasks.
- Provided technical leadership and guidance on Salesforce architecture, Apex, Lightning Components, Flows, integrations, and asynchronous processing.
- Designed and developed custom Salesforce solutions using Apex Triggers, Apex Classes, Lightning Components, and Asynchronous Apex to support complex business workflows.
- Led the implementation and maintenance of Salesforce–Heroku integrations, enabling seamless data exchange and supporting custom web applications for membership portals and ticketing systems.
- Guided the team during the migration from Salesforce Classic to Lightning Experience, ensuring application compatibility, improved user experience, and optimized performance.
- Designed and reviewed automation solutions using Salesforce Flows, Process Builders, and Workflows to streamline museum operations, including ticketing, donor management, membership, and event processes.
- Led the development and modernization of Lightning Components and Visualforce pages, ensuring alignment with Lightning Experience standards and Salesforce development best practices.
- Conducted code reviews, technical design reviews, unit testing, and performance analysis to ensure high-quality, scalable, and maintainable solutions.
- Mentored Salesforce developers and supported the team in troubleshooting complex technical issues, following coding standards, and adopting Salesforce best practices.
- Managed development tasks, prioritized technical work, and coordinated with project managers and stakeholders to ensure timely delivery of sprint and release commitments.
- Participated in deployment and release management activities, ensuring clean and accurate deployments across environments using version control and established CI/CD

practices.
- Provided technical support during and after deployments, leading issue resolution, root-cause analysis, and production stabilization.
- Acted as a technical point of contact between the Salesforce development team, business stakeholders, and client teams to ensure effective communication and successful project delivery.

- **Client:** ***Lionrock Recovery – Online Substance Abuse Counselling (U.S.-Based Healthcare Client)***

  Responsibilities:

- Provided ongoing support and maintenance for Lionrock's Salesforce Sales Cloud environments.
- Developed and maintained custom Apex classes, triggers, Lightning components, and Visualforce pages to enhance platform functionality.
- Handled day-to-day troubleshooting, bug fixes, and user support related to Salesforce functionality.
- Developed and optimized Flows, Process Builders, and Workflows to automate business processes and improve operational efficiency.
- Built custom Lightning Components to enhance the user interface, including the conversion of legacy Visualforce pages to the Lightning framework.
- Managed deployment activities, including version control and release management, ensuring accurate, error-free deployments.
- Performed in-depth code reviews and analysis to uphold high standards of code quality and compliance with Salesforce best practices.
- Collaborated with business analysts and admins to gather requirements and deliver solutions quickly.

➢ ***Client: Vitra Health – U.S.-Based Home and Community Healthcare Provider***

Responsibilities:

- Collaborated with healthcare stakeholders and business analysts to gather requirements and translate them into clear user stories for Salesforce development.
- Developed custom Salesforce solutions using Apex Triggers, Lightning Components, and Flows to support care coordination and patient management workflows.
- Participated in migrating from Salesforce Classic to Lightning Experience, modernizing legacy Visualforce pages for improved usability and performance.
- Designed and maintained automation solutions to streamline healthcare processes, including Flows and Process Builders.
- Assisted in deployment and release activities, performed code reviews, and provided post-deployment support to ensure smooth adoption by care teams.

06/2021 – 09/2024 ***Salesforce Developer, Power Soft Global Solutions, Bangalore , India***

- **Client:** ***MSG Staffing***

  Responsibilities:

- Analyzed user requirements and developed applications accordingly.
- Create a custom object, fields, record types, and page layouts to meet business needs.
- Was proficient in web based app development (Lightning Web Components, Apex, Batch, Test, Schedule classes, Salesforce.com).
- Deployed and migrated data using Change sets and Data Loader.

- Assisted testing team in understanding requirements and preparing test scripts.
- Performed Salesforce CRM administrative and configuration tasks.
- Implemented various data management features like pick lists, validation rules, etc.
- Created reports, dashboards, and processes for continuous data monitoring.
- Optimized APEX code for performance and compliance with governor limits.
- Used Salesforce.com developer toolkit for custom business logic and data imports.
- Implemented Batch Apex and schedulable processes.
- Gathered stakeholder requirements and designed custom Lightning Web Components.
- Configured dashboard layout with custom charts and graphs.
- Identify, troubleshoot, and resolve system issues and bugs in a timely manner.
- Documented code and processes for maintenance.
- Collaborated with teams to gather feedback and improve dashboards.
- Integration with third-party job boards, background check services, and HR management systems.
